

# SKN3345 E

## Acrylonitrile Butadiene Rubber

### Description

SKN3345 E is a copolymer of butadiene and acrylonitrile manufactured by cold emulsion polymerization technology.

The product is a low Mooney, medium acrylonitrile polymer designed to aid in processing operations such as transfer and compression molding.

### End Use

SKN3345 E is recommended for use in industrial and automotive parts such as oil hose.

### Packing

Available in wooden crates of 450 kg net weight. Bales are wrapped in PE film and four-layer craft bags of about 30 kg each.

### Origin

Country: Russia

### Material Specifications

Property	Unit	Specification
Mooney Viscosity*	ML	41—50
Volatile Matter, max	%	0.8
Acrylo-Nitrile content	%	31—35
Elongation at Break, min	%	450
Tensile Strength, min	Mpa	22.5
Stabilzer		Non Staining
